

Reusche Colors

Replacement Colors

Profile:

Glass enamels, exhibiting high gloss.

Firing Temperature:

1120-1160°F (600-630C) Firing cycles are dependent on the type of thickness of the glass, size and type of kiln, kiln load, lehr and belt speed.

Mixibility:

All colors within the range are fully intermixable. However, we recommend running pre-production tests to verify color stability.

Application:

Supplied as powder or pastes for screen printing, either hot or cold, and spraying.

Health & Safety:

For detailed Health and Safety requirements consult the appropriate Material Safety Data Sheets.

	These colors contain lead and/or cadmium. Do not use on food bearing surfaces, toys or children's items.
	Dishwasher durability is high.
